Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/25/2010 has been entered. The supplemental amendment filed on 4/29/2010 has also been entered.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Jonathan Goodman on 5/4/2010.

The application has been amended as follows:

In claim 1, line 4, replace "consisting of" with --that is-- and insert --consisting-- after the word "product".

In claim 13, line 1, replace "silicate" with --phyllosilicate--.

In claim 13, line 5, replace "consists of" with --is--.

In claim 13, line 6, insert --consisting-- after the word "product".

Art Unit: 1796

In claim 13, line 8, delete the word "silicate".

In claim 13, line 9, delete the word "silicate".

In claim 20, line 3, replace "consisting of" with --that is--.

In claim 20, line 4, insert --consisting-- after the word "product".

In claim 25, line 3, replace the word "modified" with --modifier--.

In claim 25, line 3, replace "consisting" with --that is a protonated reaction product consisting of--.

Statement of Reasons for Allowance

The present claims are allowable over the closest prior art Lan et al (US 6,232,388) and Barbee et al (US 6,384,121) for the following reasons:

Lan et al discloses intercalated layered materials which are intercalated with an onium ion and MXD6 which is prepared from m-xylylenediamine and sebacic acid; however, the present claims require that the layered phyllosilicate is intercalated with protonated reaction product without prior sorption of an onium ion spacing agent. The instant product-by-process limitations clearly provide for a different product over prior art because the onium ion of Lan et al remains with the phyllosilicate.

Barbee et al discloses a polymer/clay nanocomposite comprising a layered material with a functionalized oligomer; however, the functionalized oligomer is not "protonated" like claimed because the functionalization of Barbee et al's oligomer requires grafting of a functional group and not the protonation like claimed. To clearly distinguish the protonation like claimed and the

Art Unit: 1796

functionalization of Barbee et al, applicant provided a definition of protonation which is the addition of a proton and not a functional group.

Thus, it is clear that the references, taken individually or in combination, do not disclose or suggest the claimed invention.

In light of the above, it is clear that rejections of record are untenable and thus the present claims are passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
